

Phoenix Systems Executive Dashboards are critical business intelligence tools that help you quickly identify trends and performance tendencies in an easy-to-view profile.

Leveraging the power of SAP Xcelsius, Phoenix Systems interactive dashboards draw information from Sales Analysis and raw transactional data in SYSPRO. The result is a collection of interactive graphs, gauges and charts that brings your data to life, including many metrics and measurements not easily accessible in SYSPRO.

The true power of Executive Dashboards is its ability to distil multiple, complex reports onto one screen, delivering focused, timely and relevant information based on YOUR data, YOUR and requirements.

Executive Dashboards run outside of SYSPRO – requiring no SYSPRO user to view – are completely secure and are delivered in a simple desktop output available in dynamic PDF or Shockwave (SWF) format.

What will Executive Dashboards do For YOU?

- Provide instant, easy-to-consume, dynamic visibility to numerous metrics and consolidated data not currently accessible in SYSPRO.
- Save valuable company time and money in complex report preparation.
- Provide management with a comprehensive snapshot of designated performance levels; refreshed in real time, each time the file is opened or at a predetermined interval.
